

Putting the CEAS Program to Work for You

Developed with the input of local organizations and businesses, CEAS is the only known program to offer the private sector an Access Control System through agreements with local government and provides:

Partnership - Creates a bond between local government and area businesses for the purpose of minimizing economic loss resulting from disasters or emergencies.

The CEAS Advantage.

Identification - CEAS' unique ID Cards enable law enforcement officials to recognize those responsible for maintaining and restoring business.

Access - Allows critical employees to enter restricted areas, through the use of the CEAS ID, to sustain operations and initiate recovery.

Resiliency - Reduces enterprise risk by helping businesses rebound quickly from a disaster.

Security - Provides a formal process ensuring that the right people have access to the right places at the right time.

How to Enroll

Visit the CEAS website at www.ceas.com or call our Customer Support Center at **888-353-BNET** to learn more about the System and to enroll. It's fast, efficient, and it will bring true peace of mind to you — and security to your company.

PARTNERSHIP

The Corporate Emergency Access System

The essential tool in times of crisis and emergency.

The world is more complex, demanding, and fraught with danger than ever before. From the global threat of terrorism to the looming potential for natural and man-made disasters, it has never been more important to ensure that business and industry facilities quickly resume operations in the aftermath of a crisis.

The Corporate Emergency Access System, or CEAS, was developed to help address this new set of realities. CEAS is an Access Control System that assists government and private sector entities, in addressing the important issue of post disaster re-entry. CEAS allows critical business employees to gain access to restricted areas following a disaster or serious emergency by using a secure identification card, recognized by the police, through a partnership and formal agreement with State and/or local government authorities.

"The CEAS Program makes it easier for businesses to recover when a major disaster occurs."

— Commissioner Joseph F. Bruno, New York City Office of Emergency Management.

Our Mission and Goals

The CEAS Program goal is to help businesses mitigate damage and loss resulting from a disaster or emergency. This is accomplished by allowing businesses rapid access to restricted areas following emergency events. Participating businesses select a pre-determined number of employees to receive CEAS access ID cards based on total employee population. These critical employees can quickly get back to work, assess damages and ensure their companies' viability, continuity and recovery.

"CEAS is an important initiative for the business community. Having experienced the distress of recovering from a disaster first-hand, we are grateful to have a new system in place."

— Dennis Friedrich, President & COO, Brookfield Properties U.S. Commercial Operations

CEAS Benefits

By allowing safe and secure emergency access, CEAS gives businesses the opportunity to put a sound emergency management plan in place and reduce enterprise risk. Not only does this ensure the rapid recovery of essential operations, but CEAS also provides businesses with the ability to rescue valuable assets left behind in an emergency such as cash, checks, and securities; retrieve vital records, hardware and critical equipment; stabilize and sustain core IT systems, conduct damage assessments, and much more.

CEAS: Cutting-Edge Identification

First developed in 1999 by the Business Network of Emergency Resources, a not-for-profit organization, the CEAS program leads the way as a best practice in secure emergency access control for private sector entities. A state-of-the art system enables business and industry to acquire a pre-event, emergency identification card that is accepted locally and regionally when it is needed the most.

The Business Network of Emergency Resources continues to optimize its web-based process with new and evolving technology. This eliminates the need for private businesses to purchase and maintain expensive software and hardware, and results in an improved customer experience from application to card production. All CEAS cards are designed with security in mind, meeting the latest physical and topographic security standards for identification cards.

Today, countless businesses of all types that take emergency preparedness seriously have made the CEAS program a part of their comprehensive business continuity plans. CEAS is accepted by government and business in some of America's most important economic and educational centers. To find out if CEAS is available in your area visit our website at:
